

# SLUDGE BUSTER

**SLUDGE:** Ionizing electromagnetic potential that is created by combustion and fluorescent lights. 3 to 10% of the world's population can feel it attacking their bodies. Many can't but all suffer its devastating effects. Wikipedia writes: "There are no specific symptoms associated with claims of Electromagnetic Hyperactivity Syndrome (EHS) and reported symptoms range widely between individuals. They include headache, fatigue, stress, sleep disturbances, skin prickling, burning sensations and rashes, pain and ache in muscles and many other health problems." However, the specific energy causing this phenomenon has defied the world's scientists. The World Health Organization (WHO) on their website, writes "Conclusions: EHS is characterized by a variety of non-specific symptoms that differ from individual to individual. The symptoms are certainly real and can vary widely in their severity. Whatever its cause, EHS can be a disabling problem for the affected individual. EHS has no clear diagnostic criteria and there is no scientific basis to link EHS symptoms to EMF exposure. Further, EHS is not a medical diagnosis, nor is it clear that it represents a single medical problem." At Sound Vitality, we discovered that the effects of EHS and the benefit of Sludge Buster technology can be quantified through a simple urine test that measures the free radical end product concentration in the body.

**Congratulations on joining the growing numbers who are enjoying increased health through their use of our easy-to use Sludge Busters.**

**The Auto Sludge Buster** plugged into your cars 12V power socket protects you and your passengers. It connects through the electrical system to the entire metal body of the car, cleansing it of ionizing potential.

**The Home Sludge Buster** can cleanse the ionizing potential from an entire small house. However, if your home is larger, or is located near power lines or heavy car traffic, additional units can be beneficial. Consider locating one in any of these locations:

- Close to your office and office equipment
- Close to your bed
- Close to your circuit breaker where electrical power first enters the house.
- In the Family Room or any room that has high occupancy.

If you will be using more than one SludgeBuster, consider one at ground level near where power enters the house and the other at the opposite end of the house on the top floor. This is because the extensive wiring in a large home can act as an antenna, collecting ionizing potential from a polluted environment.

## **Vital Harmony Pendant**

The Vital Harmony Pendant was our first powerful entry into the area of protecting the body from the damage caused by environmental ionizing potential. See our double blind study on the reverse side.

## **The Sludge Buster Family**

Sound Vitality is devoted to bringing you the very best answers to reduce human suffering by providing means to remove sludge (toxic energy patterns) from our bodies, emotions, mind, and environment. The Auto and Home SludgeBusters are just two of our offerings. **Here are some more which relieve suffering from a wide variety of Sludge:**

**Air Travel Protection:** The Vital 1 strengthens the bioelectric field and pulls in the emotional body during air travel to protect your vitality while you fly. Now with special infrasonic pulsations in the body's electrical field to provide immediate relief from anxious and fearful feelings. Fly with your vitality protected. Arrive rested with minimal jetlag. "Don't Leave Earth Without it!"

**Community Protection:** The Community Sludge Buster Absorbs ionizing potential up to about a 5 mile radius.

**Cellular Pain and Inflammation Reduction** – Infratonic FDA listed Therapeutic Massager with unpredictable Infratonic massage patterns to break up stress, emotion, inflammation and pain anywhere in the body. Portable and battery powered to provide relief and accelerated recovery wherever you go.

**Pain, Numbness, and Degeneration in Legs and Feet** – The VitalRest FDA Listed Therapeutic Massager with Unpredictable Infratonic massage patterns to break up stagnation and improve circulation in the Legs and Feet.

**Chronic Anxiousness, Reactivity, and Rage** – the Nessor System systematically reduces the unconscious reactive programming inherited from ancestors and traumatic childhood.

(see other side for what customers have said about these products)

"I have used products from Sound Vitality for many years. All have been excellent and have enhanced my life in many ways. I feel safe using their products. The latest product I am using is the Vital Harmony Pendant. It has measured up to their usual standard and is amazing. I was looking for help with the electromagnetic energy that surrounded me, including the wireless computer and TV in my bedroom. So I purchased the Vital Harmony Pendant and am wearing it night and day. I feel much safer and am wonderfully surprised with the energy I feel when wearing the Vital Harmony Pendant.

The staff at Sound Vitality are very friendly and knowledgeable."

-- Johanna C

## Is there Sound Science behind our Sludge Buster? YES!

We live in a world that is bombarded by Ionizing potentials, which enter the body through the air and by transmission through power distribution systems, Wi-Fi and cell phones. This Ionizing UV creates free radicals in the body, which have been shown to cause disease. The VitalHarmony Pendant is composed of a mineral core wrapped in crystalline copper wire used in all our Sludge Busters. It is highly efficient at absorbing ionizing electromagnetic radiation (between 200nm and 280nm) through the magnetic field produced by the heart and circulatory system which surrounds the body. The pendant then transforms the frequency of this energy to a safe level, which vitalizes the body without creating free radicals. By wearing this pendant over the center of your chest you can protect your body from damaging UVC energy.

A blinded, sham controlled study shows substantial reduction (16.7%) in urine free radical end products (as measured with YESYOU LPO test kit, Tokyo, Japan) when compared with a visually identical sham device (1.25)%. A larger scale multi-facility study is in progress.
